ERTL Wood Industry

Our short history

Today, we can look back on more than 30 years of our company's history. Our manufacturing operations began as a small family business. Later, ER-FA 2000 LTD was founded, and in 2001, when manufacturing was separated from sales, ERTL Wood Industry LTD was established.

Our Technology

We manufacture furniture for corporate clients, from design to finish, ranging from the simplest solutions to high-tech.

We are equipped with a range of machinery typical of the modern woodworking industry: plate cutting machines, CNC machining centers, contact sanders, flat and vacuum presses, cabinet presses, and packaging machines. Surface treatment is carried out using state-of-the-art surface treatment and veneer processing machines and technologies; high-gloss and special finish surfaces are also produced in our own workshop.

We attach particular importance to environmental protection, which is why, at our customers' request, we only use controlled, FSC®-certified raw materials from sustainable sources in our production processes.

Our Main Profiles

Our services include the production, delivery, and installation of custom furniture for the following types of projects:

- Hotels and lodging facilities, residential buildings
- Shop fitting, store solutions, restaurants, and catering and gastronomic establishments
- Social and healthcare institutions, rehabilitation centers
- In addition, we provide CNC machining services for engineered wood panels.

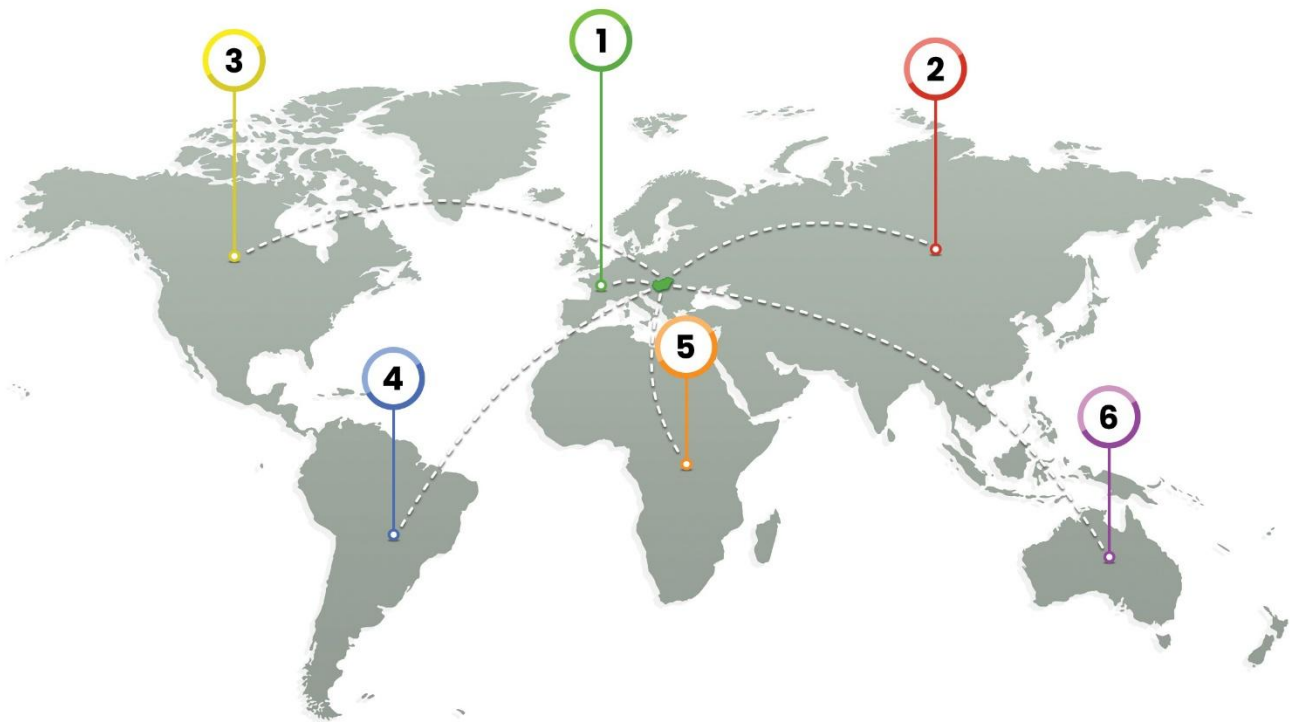

ERTL Wood Industry

Facts and Figures

Our group of companies employs 180 people. Our company comprises a 4,500 m² production area, a 6,000 m² warehouse for raw materials and finished products, and a 2,000 m² retail and office space. In 2025, our company's revenue exceeded 9 million euros.

Le Primore Hotel & Spa ★★★★★

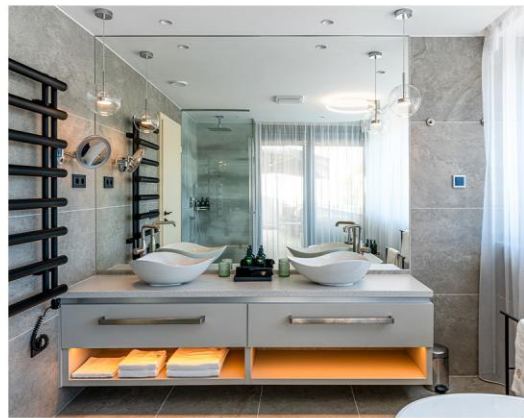

The luxury Le Primore Hotel & Spa located in Hévíz, Hungary, welcomes its guests with nature-inspired elegance and complete wellness experiences.

We designed the unique interiors of the 229 guest rooms, 49 suites, 6 infinity suites, and the presidential suite, as well as the full fit-out of the public areas.

Le Primore Hotel & Spa ★★★★★

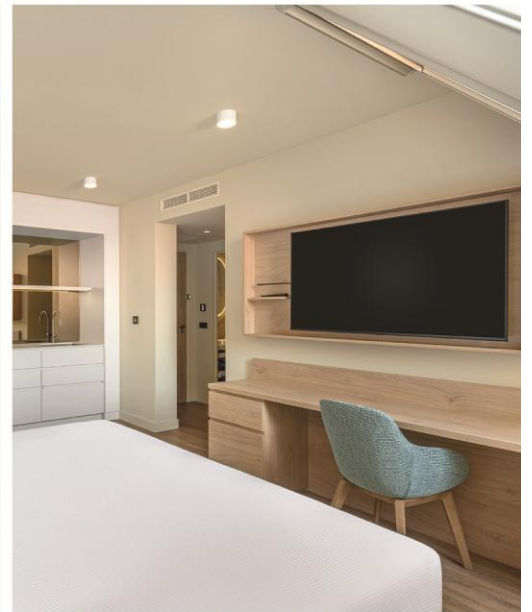

The materials used include: high-quality decorative laminated chipboard, HPL, veneer, lacquered surfaces, curved glass, acrylic, interior stone surfaces, and upholstered furniture.

A hotel belonging to an international hotel group

As part of the interior design for the elegant hotels in Debrecen and Budapest, which are part of an international hotel group, we carried out extensive furniture fabrication work.

In Debrecen, we furnished a total of 102 rooms and designed the wall coverings in the hallways and common areas – such as the lobby, the restaurant, and the sky-bar.

A hotel belonging to an international hotel group

The hotel in Budapest comprises 219 guest rooms and common areas, all of which were furnished by us. Every detail of the made-to-measure furniture in the guest rooms is designed to offer guests maximum comfort and relaxation. The furniture design was developed not only by our designers but also in collaboration with the client.

The materials used include: exclusive decorative laminated chipboard, HPL, acrylic, and upholstered furniture.

Hotel Helikon ★★★★★

The Hotel Helikon is located in Keszthely, Hungary, where we furnished the 176 rooms. When designing the room furnishings for this hotel, our primary focus was on ensuring they meet the needs of today's guests. We are pleased that we were able to help it remain a unique accommodation in the Keszthely Bay on Lake Balaton while also contributing to a comfortable stay for hundreds of people.

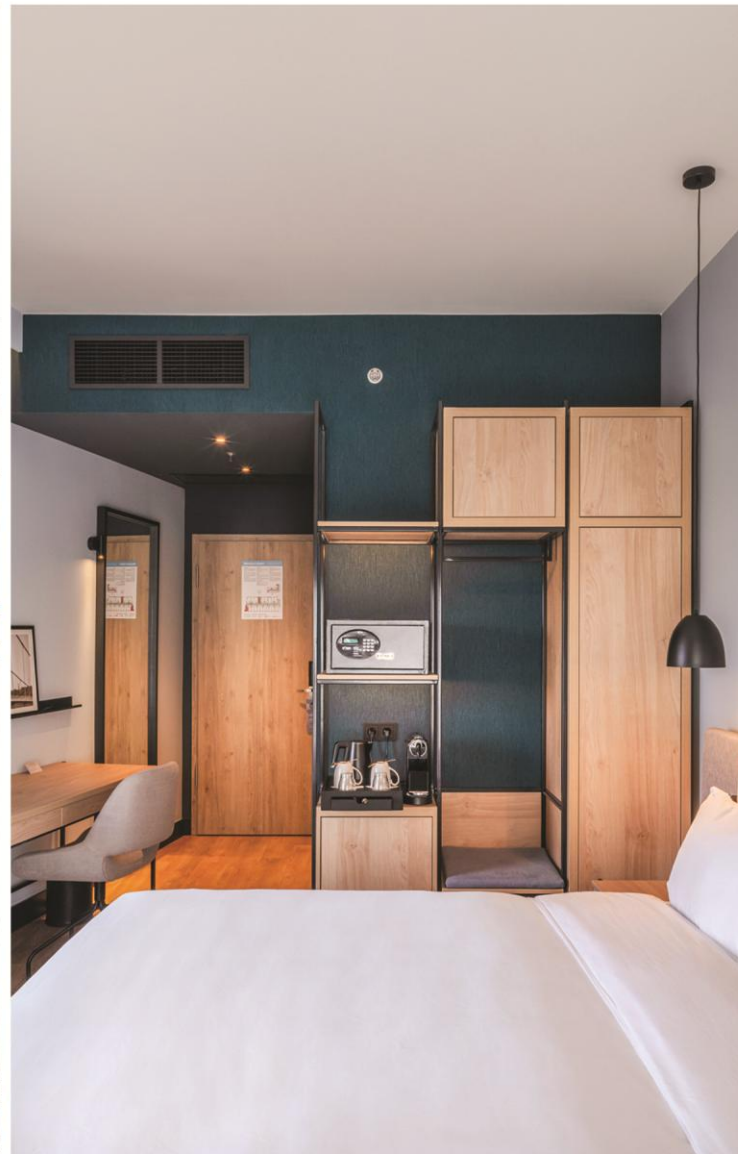

The materials used include: premium decorative laminated chipboard, HPL, acrylic, upholstered furniture.

Radisson Hotel Budapest Budapestpart ★★★★★

The Radisson Hotel Budapest Budapestpart in Hungary was built with a focus on innovation and environmental protection. The building meets high standards for sustainability and certified quality. The hotel's unique concept and design combine architectural and eco-friendly elements, ensuring guests enjoy comfortable and modern accommodations. We furnished 198 rooms here.

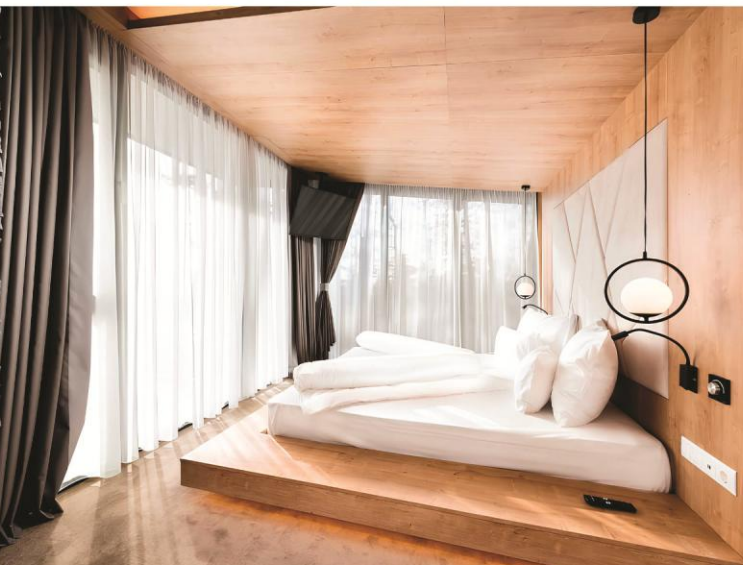

The materials used include: exclusive decorative laminated chipboard, modular metal structures, upholstered furniture.

Hotel Ózon & Luxury Villas ★★★★★

The Hotel Ózon & Luxury Villas**** in Mátrahaza, Hungary, is located at the foot of Mount Kékes and offers ideal conditions for both active and passive relaxation. We have uniquely furnished a total of 121 guest rooms and living spaces in the hotel, including 99 Superior and Executive rooms, 8 Deluxe rooms, 4 suites, the Presidential Suite, and 11 separate luxury villas in the park.

The materials used include: high-quality decorative laminated chipboard, HPL and lacquered surfaces, veneer, acrylic, interior stone surfaces, upholstered furniture.

Energy Hotel & Business Center ★★★★★

As part of the project, we furnished the 84 standard rooms and 4 suites at the Energy Hotel in Paks, Hungary, as well as the lobby, entrance area, and restaurant. The design is based on a combination of functional solutions and a harmonious, clean aesthetic.

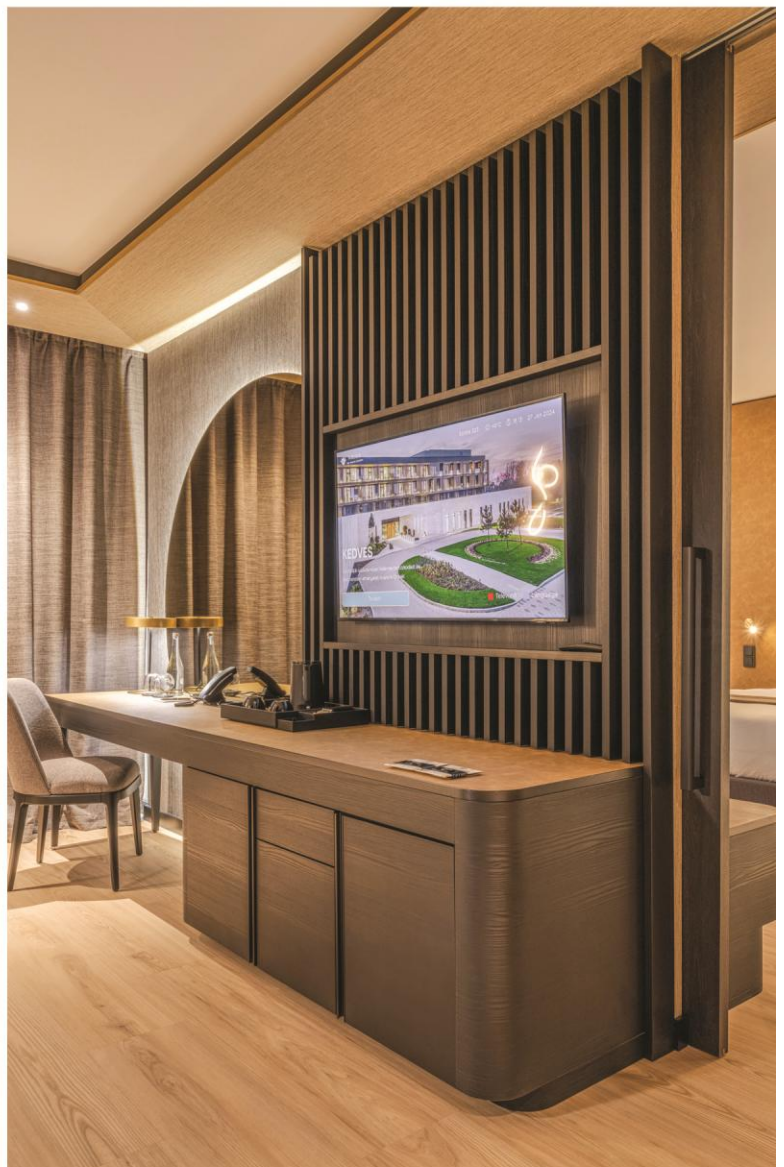

The materials used include: premium decorative laminated chipboard, HPL, upholstered furniture.

Melea – The Health Concept Hotel ★★★★★

When designing the Melea Hotel in Sárvár, Hungary, the focus was on creating 79 stylish guest rooms, 4 exclusive suites, and public areas that prioritize guest comfort. We are proud to have used our modern design to create a harmonious, elegant, and welcoming atmosphere that offers guests a pleasant experience.

The materials used include: exclusive decorative laminated chipboard, HPL and lacquered surfaces, veneer, interior stone surfaces, upholstered furniture.

Chalet Obergurgl ★★★★★

This luxury Five-Star hotel in Tyrol, Austria, is a skier's paradise in winter and a hub for active relaxation in summer. The modern design of the Twenty-four-apartment complex blends an alpine atmosphere with an elegant interior. We are proud to have contributed to the well-being of guests, allowing them to experience nature even within the building.

The materials used include: high-quality decorative laminated chipboard, HPL, veneer, interior design stone surfaces, upholstered furniture.

LUA Resort ★★★★★

This hotel in Balatonfüred, Hungary, combines environmental consciousness with luxury, offering guests a peaceful retreat and exclusive services. We manufactured the furniture for the 78 guest rooms as well as individual furnishings for the common areas.

The materials used include: high-quality decorative laminated chipboard, special hardware for sliding doors, and interior stone cladding.

Sauska Winery

Following the winery's investment in Tokaj, Hungary, the reception area, wine bar, conference table, overhead elements, and unique wall paneling showcase our work.

The materials used include: massive oak and walnut wood, high-quality decorative laminated chipboard, HPL and lacquered surfaces, veneer, interior stone surfaces, upholstered furniture.

ETO Sports bar

At the ETO Park restaurant in Győr, Hungary, we helped create a stylish and functional interior with unique furniture, upholstered seating areas, a bar counter, and wall paneling.

The materials used include: premium decorative laminated chipboard, HPL and lacquered surfaces, interior design stone surfaces, upholstered furniture, modular metal structures, and metal mesh wall coverings.

Central Office Óbuda Újlak

At the Central Office of Óbuda Újlak in Budapest, Hungary, we designed the interiors of the main entrance, reception area, meeting rooms, and office spaces across three floors. As part of our work, we fabricated radiator covers, room dividers, tea kitchens, and the bar counter in the Jazz Loft's common area.

The materials used include: premium decorative laminated chipboard, HPL and lacquered surfaces, acrylic, interior stone surfaces, modular metal structures.

Pad Thai Wokbar

Within Budapest and several major cities across Hungary, we have furnished Pad Thai wok bars with unique furniture that embodies the philosophy of trendy street food. Our furniture creates a pleasant atmosphere for lunch or dinner, welcoming an audience that loves the vibrant city life and is passionate about gastronomy.

The materials used include: premium decorative laminated chipboard, HPL and lacquered surfaces, veneer, upholstered furniture.

Saint James Clinic

As part of the interior design for the Vision and Aesthetics Center, we furnished the entrance hall, the central reception area, and the nurses' station, as well as 15 patient rooms and treatment rooms. The project also included the installation of unique acrylic sinks and wall panels, which contribute to creating a functional and aesthetically pleasing healthcare environment.

The materials used include: exclusive decorative laminated chipboard, lacquered surfaces, veneer, acrylic.
